Hi Rob,

As we discussed, SSP2 sampling in the 3rd River can proceed as described in the Field Modification.

Thanks,

Stephanie

Importance: High

Stephanie:

Welcome back.....

Can we discuss 3rd River Locations today? We have collected 1 location (13-1576) proposed in the Field Modification - three attempts were made to collect cores - all resulted in recoveries of less than 80% - no samples were processed. Three surface grabs were attempted and two had no recovery - the third had sufficient volume for all analytes - this is being held until approval of the Field Modification. We are utilizing the small sampling vessel for this work and the vessel is scheduled to leave on Friday.

Thank you.

R/

Rob
